Baker Commodities (ID 800016)-- no
comments

Vicky -

Thank you for the opportunity to review the proposed Title V minor modification for Baker Commodities (Facility ID 800016). In accordance with South Coast AQMD regulations and 40 C.F.R. § 70.8(c), EPA has 45 days from receipt of the proposed permit and all necessary supporting documentation to object in writing to its issuance. The Agency's 45-day review period will expire on April 21, 2005. However, EPA has performed an expedited review of the proposed permit. We have concluded our review and have no comment; the permit is now eligible for issuance. Please note that although we are terminating our review early, the 60 day period for the public to petition the Administrator to object to the permit begins on April 22, 2005, the day after EPA's 45 day review period would otherwise end. Please let me know if you have any questions.

Sincerely,

Katie Stewart
